From the statue of Pennsylvania's founder, William Penn, atop Philadelphia's City Hall to the site of Benjamin Franklin's home and print shop and from Independence Hall to the Liberty Bell, the city is richly steeped in the early history of the republic.

The year 1987 marks the 200th Anniversary of the adoption of the Constitution of the United States and Philadelphia is the focal point of the celebration of this historic document, "We the People 200".

Philadelphia's skyline is one of the most striking of any major city in the United States and Maple Glen is a tiny suburb just to the north in Montgomery County.

Amateur Radio Station W3ZXV is operated from there by Gene Pressler, an Assistant Director of the American Radio Relay League and a 35-year amateur operator. The station itself employs a Kenwood TS-940 transceiver operating into a Heath SB-220 linear amplifier and a 45-foot crank-up, tilt-over tower with a Telrex triband beam on 10, 15 and 20 Meters, a 75 Meter sloping vee or a 10 Meter ground plane at 35 feet.
